VERRANO

ARCHITECTURAL FINISHES

COMMERCIAL CAPABILITY / AUCKLAND

Transform surfaces. Reimagine workplaces.

Architectural wrapping for suitable existing reception counters, office kitchens, doors and interior joinery. Based in East Tamaki, serving Auckland.

BEFORE

AFTER

A considered finish change can give an existing workplace a fresh material direction. We assess the surface, define the scope and agree the installation plan before work proceeds.

VERRANO operates under Vivid Icon, sharing operational resources with sister brand SignSpot. Surface refurbishment and any signage requirements are scoped for your project.

SURFACES / FINISHES / COMPLETED WORK

A coordinated material direction.

Reception & arrival

Suitable counter frontages, returns and visible panels.

Office kitchens & storage

Cabinet fronts, drawer fronts and agreed exposed panels.

Doors & interior joinery

Suitable door faces, boardroom cabinetry and storage.

Finish selection

Explore Cover Styl wood, stone, solid-colour and other decorative film directions. Confirm the selected product and application individually.

COMPLETED AUCKLAND INSTALLATION / BEFORE & AFTER

Photographs supplied and confirmed by VERRANO / Vivid Icon as completed installations. Exact finish references, project dates and installation durations are available only where recorded.

ASSESS / SPECIFY / PLAN / INSTALL

Make the next step a clear one.

01 / Share the brief

Send photographs, dimensions or a surface schedule, your Auckland location and target programme. PDF drawings are welcome.

02 / Assess & select

Review substrate condition, preparation, edges, coverage and selected film suitability. Physical samples: availability, cost and delivery confirmed individually.

03 / Agree the proposal

Confirm surfaces, product references, exclusions, access and sequence. After-hours work and phasing are discussed for each project.

04 / Complete & care

Follow the agreed installation scope and the care and warranty information applicable to the selected product and installation.

Fire-rated doors, lift surrounds and regulated assemblies require project-specific technical review. No generic film selection establishes compliance.

Your commercial project starts here.
